

Preñada

“Relieve Pregnancy Anxiety”

Customized Checklist

A weekly customized checklist that aims to help the users complete their pregnant-related mission.

Body Data Tracking

A tracking system that will record the user's mental and physical data to optimize the recommendation.

Recommendations

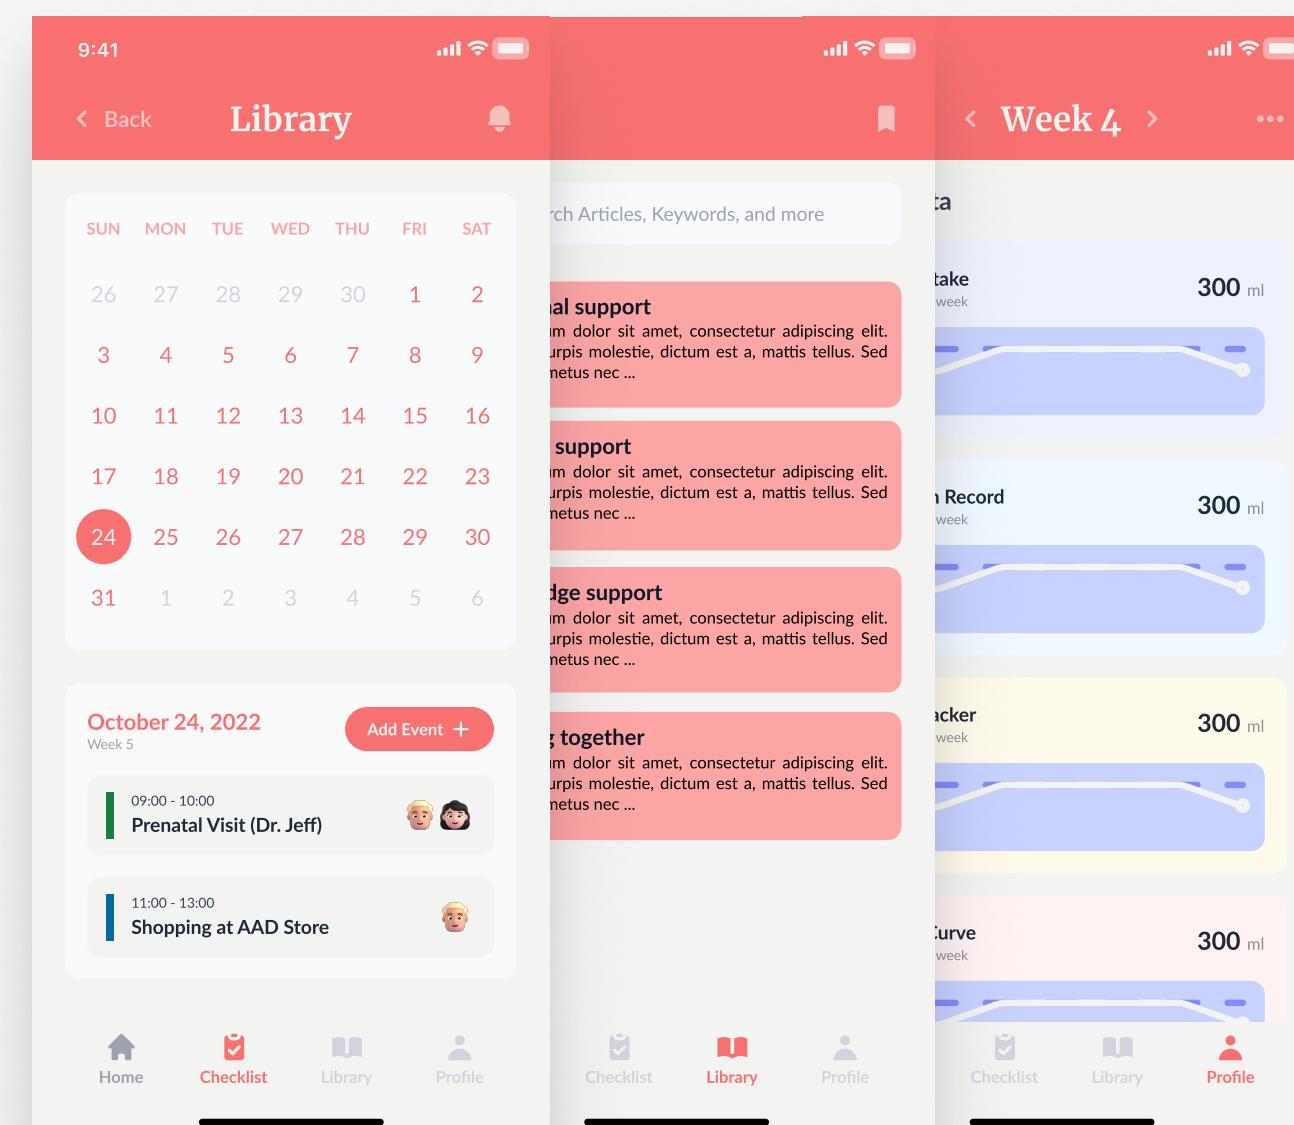

Recommended knowledge which take the user's pregnancy progress and personal data as reference.

Design Iteration

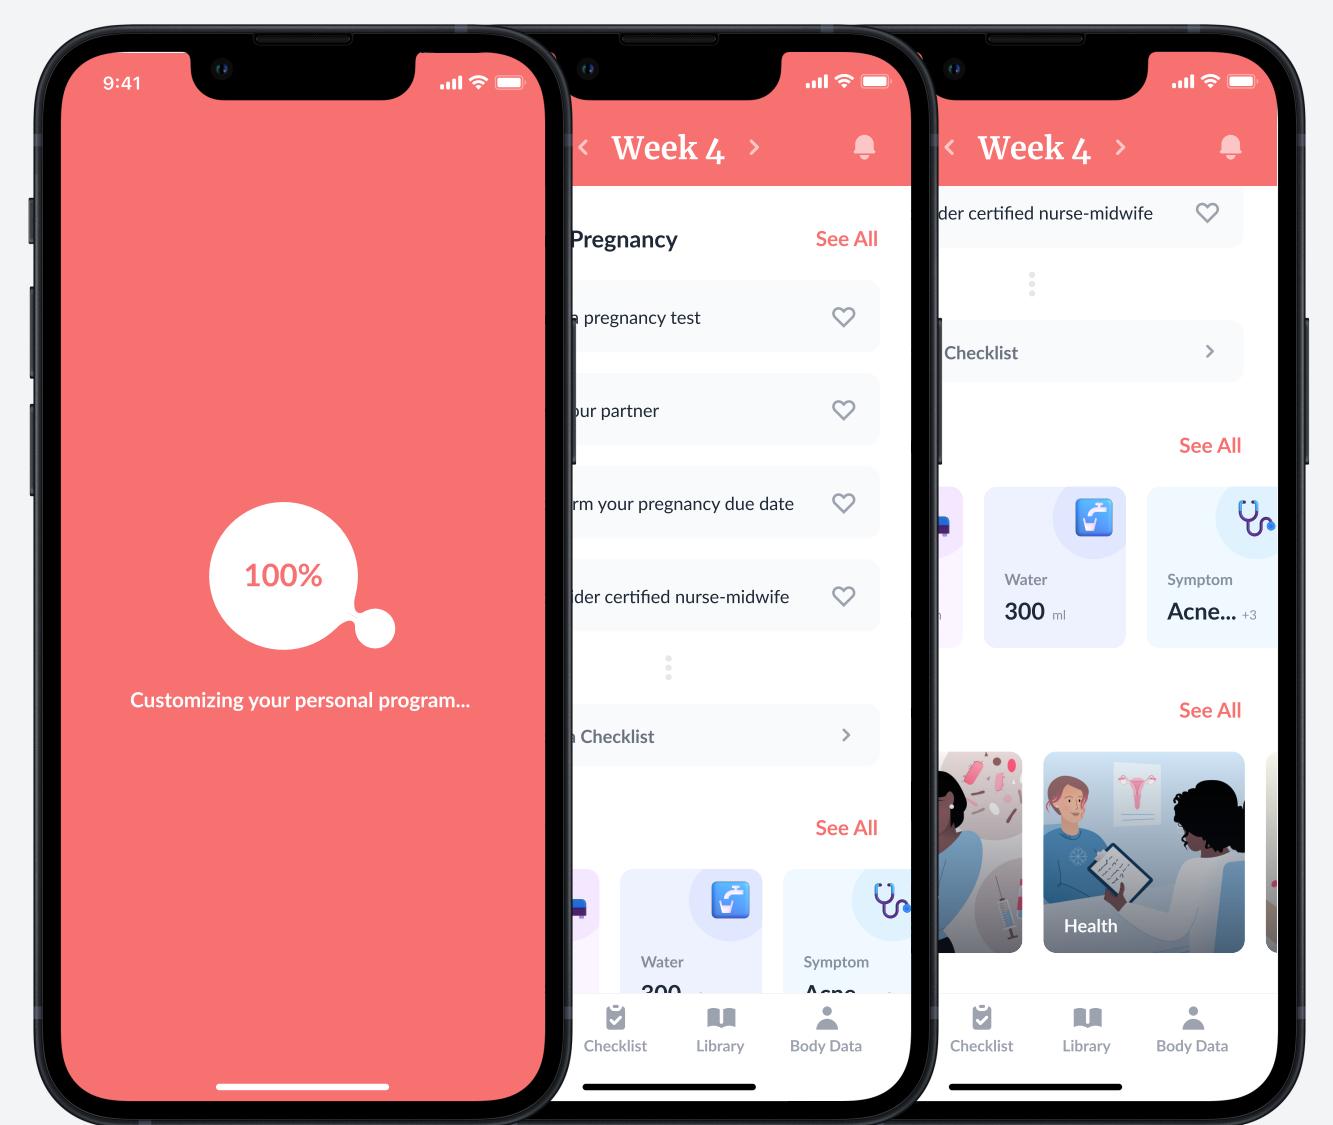

Paper Prototype

Using sketches and paper to develop our first UI design idea.

Medium-fi Prototype

Using Figma as our design platform to frame our final app pattern.

High-fi Prototype

Using React.js for building front-end UI components, and manage the back-end data using MongoDB.
